

Tatiana Alejandra Jaramillo Hoyos

Game Developer (Unity) | Software Engineer | UX & Creative Design

Medellín, Colombia | +57 313 246 5474 | talejandra.jaramillo@gmail.com | [linkedin.com/in/tarjah](https://www.linkedin.com/in/tarjah) | github.com/tatyajh | [Portfolio](#)

PROFESSIONAL PROFILE

Game developer and Software Engineer trained in Unity and C#, backed by more than three years building digital products with React, TypeScript, and Node.js. I combine engineering rigor, scalable architectures, automated testing, and secure-by-design practices, with a creative sensibility shaped by design and music training, which I apply to character concepts, world-building, and memorable user experiences. I work with Spec-Driven Development and generative AI to prototype and validate ideas quickly, moving fluidly between programming, experience design, and content creation.

EDUCATION

CESDE, Medellín, Colombia — Technical Degree in Fashion Design	Jun. 2026
Universidad de Antioquia, Medellín, Colombia — Systems Engineering	Jun. 2021

CONTINUOUS TRAINING

- Junior Unity Developer Bootcamp — Generation Colombia (2026)
- Cybersecurity Fundamentals Certification — Betek (2026)
- Software Development Bootcamp — Women Who Code and Gorilla Logic (2024)
- Web Development Certification — Misión TIC (2022)
- Machine Learning and Data Analysis with Python Course — Universidad de Antioquia (2022)
- Game Development Bootcamp — Universidad de Antioquia and Ubicua (2021)
- English Certificate — EF SET (2022)

WORK EXPERIENCE

GYG Empaquetaduras, Remote — Software Developer (Freelance)	May 2025 – Present
- Developed and optimized the company website, improving online presence and user experience. - Integrated payment gateways end to end, enabling the client's first digital sales channel.	
ABATech, Medellín, Colombia — Software Engineer	May 2023 – Jul. 2025
- Designed and implemented scalable applications with React, TypeScript, and Single-SPA architecture. - Led the adoption of automated testing (Jest, Cypress, Playwright), strengthening the team's confidence to ship releases. - Managed application state with TanStack Query and Redux; implemented monitoring with New Relic.	
By Ju's Future School, Remote — Programming & Game Development Instructor	Oct. 2022 – May 2023
- Taught programming fundamentals through game development in JavaScript to children and teenagers. - Designed interactive, gamified learning experiences combining narrative, logic, and creativity.	
Independent Clients, Remote — Software Developer (Freelance)	Jan. 2020 – Mar. 2021
Built interactive, responsive interfaces with React and JavaScript, integrating REST APIs.	
Registraduría Nacional, Tuya S.A. and Universidad de Antioquia, Colombia — IT Support Analyst	Jan. 2014 – Apr. 2022
Provided technical support under ITIL principles and automated internal processes with macros and Linux scripts.	

SKILLS

Game Development:	Unity C# Character Design World-Building Concept Development Interactive Prototyping Game Design
UX & Creative Design:	UI/UX Visual Concept Development Character Design Aesthetic Sensibility (Fashion Design training)
Music & Creativity:	Saxophone Musical Training Creative Thinking Applied to Narrative
Programming:	React TypeScript JavaScript Node.js C# REST APIs Single-SPA Jest/Cypress/Playwright
Methodologies & AI:	Spec-Driven Development AI-Assisted Development Agile Scrum
Security:	Cybersecurity Fundamentals
Soft Skills:	Problem Solving Teamwork Communication Adaptability Continuous Learning

PROJECTS

- Cinematic Portfolio** (2025 – Present): narrative, interactive web experience (Next.js, TypeScript, Framer Motion) connecting character design, music, and movement in an audiovisual timeline, including my game and development projects. See Portfolio above.
- Venux** (2024): mobile dating app built with React Native and Expo, featuring profile swiping, a matching system, chat, and customizable profiles.
- Verse**: e-commerce site for my own intimate apparel brand (lingerie and underwear).
