

Tatiana Alejandra Jaramillo Hoyos

Frontend Developer & Game Developer (Unity)

313 246 5474 · talejandra.jaramillo@gmail.com · linkedin.com/in/tarjah · github.com/tatyajh · Medellín, Colombia

PROFESSIONAL SUMMARY

Systems Engineer focused on game development with Unity and C#, with a solid background of over three years building products using React, TypeScript and JavaScript. My strength lies in combining engineering rigor, automated testing and scalable architectures with a creative perspective from my fashion design training, applied to character design and UI/UX decisions. I work with Spec-Driven Development and leverage AI strategically to prototype and validate ideas faster, while my cybersecurity knowledge reinforces quality and security from the design stage. I bring creativity, technical depth and fast adaptability to teams building interactive experiences.

SKILLS

Game Development: Unity, C#, Diseño de Personajes, Conceptualización, Prototipado Interactivo

Testing & Quality: Jest, Cypress, Playwright, New Relic, Git

Security: Fundamentos de Ciberseguridad

Software Development: React, TypeScript, JavaScript, Node.js, REST APIs, Microfrontend (Single-SPA)

Methodologies & AI: Spec-Driven Development, Desarrollo Asistido por IA, Agile, Scrum

Soft Skills: Resolución de Problemas, Trabajo en Equipo, Comunicación, Adaptabilidad, Aprendizaje Continuo

EXPERIENCE

Full Stack Developer (Freelance)

May 2025 – Present

GYG Empaquetaduras — Remote

- Developed and optimized the company website, improving online presence and user experience.
- Integrated end-to-end payment gateways, configuring frontend, backend and external services to enable the client's first digital sales channel.
- Resolved production issues, increasing system stability and reliability.

Software Engineer (Frontend)

May 2023 – July 2025

ABATech — Medellín, Colombia

- Designed and implemented scalable applications with React, TypeScript and microfrontend architecture (Single-SPA).
- Led the adoption of automated testing (Jest, Cypress, Playwright) from scratch, strengthening coverage and team confidence to release.
- Managed application state with TanStack Query and Redux, and refactored legacy code to reduce technical debt.
- Implemented monitoring with New Relic and supported API integrations with Node.js.

Frontend Developer (Freelance)

Jan 2020 – Mar 2021

Independent Clients — Remote

- Developed interactive and responsive interfaces with React and JavaScript, integrating REST APIs and delivering projects on time and within scope.

IT Support Analyst

Jan 2014 – Apr 2022

Registraduría Nacional, Tuya S.A. & Universidad de Antioquia — Colombia

- Provided technical support under ITIL principles and automated internal processes with macros and Linux scripts, reducing manual work.

FOCUS AREAS

Mobile Development (2024–Present) — Mobile applications using React Native, exploring mobile-first solutions.

Backend & Services (2024–Present) — Lightweight backends and services using Supabase.

Spec-Driven Development (2024–Present) — Adoption of Spec Kit to plan, structure and validate projects with clear specifications before implementation.

AI Prototyping (2023–Present) — Proof of concepts and rapid idea validation assisted by AI.

EDUCATION

Technician in Fashion Design

June 2026

CESDE — Medellín, Colombia

Systems Engineering

June 2021

Universidad de Antioquia — Medellín, Colombia

LANGUAGES & ADDITIONAL TRAINING

Español — Nativo

Inglés — B2

- Bootcamp Desarrolladora Junior en Unity — Generation Colombia (2026)
- Certificación en Fundamentos de Ciberseguridad — Betek (2026)
- Bootcamp de Desarrollo de Software — Women Who Code y Gorilla Logic (2024)
- Certificación en Desarrollo Web — Misión TIC (2022)
- Curso de Machine Learning y Análisis de Datos con Python — Universidad de Antioquia (2022)
- Bootcamp de Desarrollo de Videojuegos — Universidad de Antioquia y Ubicua (2021)

I WRITE CLEAN CODE · I DESIGN EXPERIENCES · I BUILD GAMES · I BRING IDEAS TO LIFE
