

Tatiana Alejandra Jaramillo Hoyos

Software Engineer | Game Developer (Unity) | UX, Creative Design & AI-Assisted Prototyping

Medellín, Colombia | +57 313 246 5474 | talejandra.jaramillo@gmail.com | linkedin.com/in/tarjah | github.com/tatyajh | [Portfolio](#)

PROFESSIONAL PROFILE

Systems Engineer with more than three years of experience building scalable, reliable software products, currently training as a game developer with Unity and C#. My background combines engineering rigor, automated testing, monitoring, and strong security practices, with creative training in fashion design and music that I apply to character concepts, world-building, and user experience. I bring a long prior track record in IT support and systems administration, which gives me a well-rounded view of technology. I work with modern development methodologies and the strategic use of artificial intelligence to accelerate the creative process and decision-making. I am a versatile professional, able to move between engineering, design, and content creation, with strong adaptability and continuous learning.

WORK EXPERIENCE

GYG Empaquetaduras, Remote

May 2025 – Present

Software Developer (Freelance)

- Developed and optimized the company website using WordPress and AI-assisted tools, improving online presence, user experience, and delivery speed.
- Integrated payment gateways end to end (frontend, backend, and external services), enabling the client's first digital sales channel.
- Identified and resolved production issues, increasing system stability and reliability.
- Developed new features aligned with business needs and optimized the performance of existing sites.

ABATech, Medellín, Colombia

May 2023 – July 2025

Software Engineer

- Designed and implemented scalable web applications with React, TypeScript, and Single-SPA microservice architecture.
- Led the adoption of automated testing (Jest, Cypress, Playwright) from the ground up, strengthening coverage and the team's confidence to ship releases with fewer production incidents.
- Managed application state with TanStack Query and Redux across multiple modules, and refactored legacy code to reduce technical debt and improve maintainability.
- Built and documented reusable UI components with Storybook, aligned with product goals.
- Implemented monitoring and observability with New Relic to ensure system health in production.
- Supported backend development and API integration with Node.js.
- Used AI tools (ChatGPT, GitHub Copilot, Claude) to accelerate development, debugging, and solution exploration.

By Ju's Future School, Remote

October 2022 – May 2023

Programming & Game Development Instructor

- Taught programming fundamentals through game development in JavaScript to children and teenagers.
- Designed interactive, gamified learning experiences combining narrative, programming logic, and creativity.
- Strengthened students' communication skills and abstract thinking.

Independent Projects, Remote

January 2020 – March 2021

Software Developer (Freelance)

- Built interactive, responsive user interfaces with React and JavaScript.
- Integrated REST APIs for dynamic functionality, applying development best practices.
- Delivered projects on time and within the scope agreed with independent clients.

Registraduría Nacional, Colombia <i>IT Support Analyst</i>	January 2017 – December 2018 and 2021 – April 2022
• Provided technical support for computer systems: installation, configuration, and maintenance of hardware and software. • Resolved user technical issues under ITIL principles and managed administrative tasks related to IT infrastructure. • Automated internal processes with macros and Linux scripts, reducing manual workload.	
Tuya S.A., Colombia <i>Intern / IT Support Assistant</i>	January – December 2017
• Configured tools and databases for service asset management and configuration data of IT service providers.	
Universidad de Antioquia, Medellín, Colombia <i>Assistant Developer</i>	January 2014 – December 2016
• Designed and built custom software solutions for laboratory needs. • Configured and maintained network services (backup/recovery) and web servers on Linux. • Updated network documentation, verified software prototypes, and fixed code errors.	

EDUCATION

CESDE, Medellín, Colombia <i>Technical Degree in Fashion Design</i>	2025 – June 2026
Universidad de Antioquia, Medellín, Colombia <i>Systems Engineering</i>	2011 – June 2021
Coursework completed in 2017; degree conferred in 2021 after a period living abroad.	
ILSC & Greenwich Colleges, Australia <i>English Language Program</i>	2018 – 2020

BOOTCAMPS, CERTIFICATIONS & CONTINUOUS TRAINING

• Junior Unity Developer Bootcamp — Generation Colombia (2025 – 2026, in progress) • Cybersecurity Fundamentals Certification — Betek (2025 – 2026, in progress) • Software Development Bootcamp — Women Who Code and Gorilla Logic (2024) • Web Development Certification — Misión TIC, Universidad del Norte (2022) • "HTML, CSS, React, JavaScript" Bootcamp — Moove-IT (2022) • Machine Learning and Data Analysis with Python Course — Universidad de Antioquia (2022) • English Certificate — EF SET (2022) • Game Development Bootcamp — Universidad de Antioquia and Ubicua (2021)	
---	--

TECHNICAL SKILLS

Game Development: Unity C# Character Design World-Building Concept Development Interactive Prototyping Game Design
Web & Software Development: React TypeScript JavaScript HTML5 CSS3 Node.js REST APIs React Native Single-SPA Architecture (microfrontend)
State & Styling: TanStack Query Redux Tailwind CSS MUI Styled-components Storybook
Testing & Quality: Jest Cypress Playwright New Relic (monitoring and observability)
Backend & Platforms: Supabase WordPress Git GitHub
Data & AI: Python Machine Learning Data Analysis ChatGPT GitHub Copilot Claude (AI-assisted development)

Security: Cybersecurity Fundamentals (Betek, in progress) — secure data handling, authentication, and web application protection

Methodologies: Spec-Driven Development | Agile | Scrum

CREATIVE SKILLS

UX & Design: User Experience Design (UX/UI) | Visual Concept Development | Character Design | Aesthetic Sensibility and Attention to Detail (Fashion Design training)

Music: Saxophone (musical training), discipline, creativity, and structured thinking applied to problem-solving.

SOFT SKILLS

Problem Solving | Communication | Teamwork | Fast Adaptability | Creative Thinking | Continuous Learning | Business-Goal Orientation

PERSONAL PROJECTS

- **Verse** (2026): e-commerce site for my own intimate apparel brand (lingerie and underwear).
- **Cinematic Portfolio** (2025 – Present): interactive web portfolio built with Next.js 14, TypeScript, Framer Motion, Tailwind CSS, and Zustand, narrating the connection between fashion design, music, and movement through an audiovisual timeline, with a focus on accessibility (reduced motion, keyboard navigation) and performance. Includes my game and development projects (see Portfolio above).
- **Venux** (2025): mobile dating app built with React Native and Expo — profile swiping, a matching system, real-time chat, and customizable profiles.
- **Mi Vaquita** (Frontend + Backend): collaborative savings app built with a React frontend and an independent JavaScript backend service.
- **Spec-Driven Development** (2023 – Present): adopting Spec Kit to plan, structure, and validate projects with clear specifications before implementation, combined with the strategic use of generative AI to quickly prototype and validate ideas.
